

Fintrak

Personal Finance Tracker

AVIN OZER

MAY 2026

What is Fintrak?

Income & Expenses

A complete web application for tracking income and expenses

Analytics

Beautiful UI with powerful analytics, interactive charts and reports

Containerized

Fully containerized with Docker for easy deployment

Tech Stack

Backend

- FastAPI (Python)
- PostgreSQL
- Pydantic v2

Frontend

- React 18 + Vite
- Recharts (for charts)

DevOps

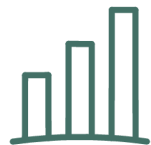

- Docker + Docker Compose

Key Features

Transactions

Add income and expense transactions

Analytics

Advanced analytics and visualizations

Export to CSV

Export data to CSV

Categories

Flexible category management with icons and colors

Search & Filters

Filters, search, and pagination

Dark Theme

Modern dark theme UI

Project Structure

File Tree

```
finance-tracker/  
├── backend/          # FastAPI, models, API  
routes  
├── frontend/         # React components &  
pages  
├── docker-compose.yml  
└── README.md
```

Main Files

- backend/main.py — All API endpoints
- frontend/src/pages/ — Dashboard, Transactions, Analytics, Categories

Implementation Details

Categories.jsx

Creating new categories

TransactionModal.jsx

Adding transactions (Income/Expense)

Dashboard.jsx + Analytics.jsx

All charts & visualizations using Recharts

backend/main.py

Backend logic & analytics

How to Run

One simple command to launch the entire application:

```
docker compose up --build
```

Application is available at <http://localhost:3000>
